Skills

- JavaScript
- Typescript
- CSS / Scss
- HTML
- React
- RxJS

Language

- Persian - Native
- English - Fluent

Profile

I am a software engineer who loves front-end development, with expertise in React, Redux, and RxJS. I am a problem solver who enjoys coding and is quick to learn new technologies.

Experience

Software Engineer 1401 – present
Bale Messenger | www.bale.ai

I used React, Redux, and RxJS to enhance the Bale web client. Successfully implemented new features such as new voice recording UI, push notifications, client site routing improvements, and multi-chunk file uploads.
I also contributed to the Android client by adding functionalities like "Go To first message" and implementing user typing logic.

Web Developer 1400 – 1401
3gaam institution | www.3gaam.com

Developed front-end for educational consulting app using React JS, and also created a web app for field-selection using Vanilla JS for 3gaam.

React Developer 1398 – 1399
Vakiljo | vakiljo.ir

I began my career at Vakiljo, a legal startup specializing in connecting clients with attorneys. I utilized React to develop their website.

Educations

Bechelor of Software Engineering
1394-1398
Imam Khomeni international University

Focused on designing optimized, scalable, flexible software. I also expand my skills on computer algorithms by participating in ACM programming contest as a part of University team.
