## 🔧 Skills

- JavaScript
- React
- Typescript
- HTML / CSS
- NodeJs
- Git
- RxJS

## 📈 Developing Skills

- Rust
- python

## 🌐 Language

- Persian - Native
- English - Fluent

## 👨 Profile

I am a software engineer a problem solver who enjoys coding and learn new technologies.

## 😎 Experience

**Software Engineer** 1401 – 1403
Bale Messenger | www.bale.ai

I used React, Redux, and RxJS to enhance the Bale web client. Successfully implemented new features such as new voice recording UI, push notifications, client site routing improvements, and multi-chunk file uploads.
I also contributed to the Android client by developing new features like "Go To first message" and Improving 'user is typing' logic.

**Web Developer** 1400 – 1401
3gaam institution | www.3gaam.com

Developed front-end for educational consulting app using ReactJS.
I also created a web app using VanillaJS for 3gaam.

**React Developer** 1398 – 1399
Vakiljo | vakiljo.ir
I began my career at Vakiljo, a legal startup specializing in connecting clients with attorneys. I utilized React to develop their website.

## 📚 Educations

**Master of Computer Architecture**
1398-1399 (dropped)
Iran University of Science & Technology

I began a master's degree in computer architecture, but I dropped out after one semester because I found the emphasis on hardware less appealing than I expected.

**Bechelor of Software Engineering**
1394-1398
Imam Khomeni international University

Focused on designing optimized, scalable, flexible software. I also expand my skills on computer algorithms by participating in ACM programming contest as a part of University team.
